NOW AVAILABLE: SPONSORED, NO-CHARGE GENETIC TESTING AND COUNSELING

HOW CAN GENETIC TESTING HELP ME?
For yourself: Knowing the genetic cause of your heart condition can help you better manage it and lead to more treatment options.

For your family: If your heart condition is genetic, your family members may have a 50% chance of inheriting it as well. Early identification of at-risk family members can lead to earlier treatment and better outcomes. If your test identifies a genetic cause, all of your blood relatives are eligible for no-charge testing through the Detect Cardiomyopathy and Arrhythmia program as well.

HOW MUCH DOES IT COST?
Through the Detect Cardiomyopathy and Arrhythmia program, Invitae provides sponsored genetic testing and genetic counseling at no charge to you. Some of the conditions eligible for this program include:

- Long QT syndrome
- Brugada syndrome
- Catecholaminergic polymorphic ventricular tachycardia
- Hypertrophic cardiomyopathy
- Dilated cardiomyopathy
- Arrhythmogenic cardiomyopathy
- Left ventricular noncompaction
HOW DO I GET TESTED?

Testing is available to patients in the US and Canada through one of the following options:

Order through your healthcare provider

Talk to your healthcare provider about sponsored, no-charge genetic testing through the Invitae Detect Cardiomyopathy and Arrhythmia program. Share this flyer to help start the conversation.

Get a test online through Genome Medical

Schedule a genetic counseling session, by phone or video, with an expert who can review your testing options and place the order. There is a cost associated with Genome Medical’s services, which may be covered under your health benefits. If you qualify for the program, there is no charge for the genetic testing itself. Get started at www.genomemedical.com/biopharma.

Find a local genetics provider

Search our genetics providers network to find a provider in your area. There may be a cost associated with the provider’s services, but not for the genetic test if you order through the Detect Cardiomyopathy and Arrhythmia program.

Get started by visiting www.invitae.com/DetectCardio

While third parties and commercial organizations may provide financial support for this program, tests and services are performed by Invitae. Healthcare professionals must confirm that patients meet certain criteria to use the program. Third parties and commercial organizations may receive de-identified patient data from this program, but at no time would they receive patient identifiable information. Third parties and commercial organizations may receive contact information for healthcare professionals who use this program. Genetic testing and counseling are available in the US and Canada. Healthcare professionals and patients who participate in this program have no obligation to recommend, purchase, order, prescribe, promote, administer, use or support any other products or services from Invitae or from third parties or commercial organizations.
